Disclaimer

Always read the instructions manual completely before using the product. No warranty or representation, either expressed or implied, is made with respect to the contents of this documentation, its quality, performance, merchantability, or fitness for a particular purpose. Information presented in this documentation has been carefully checked for reliability; however, no responsibility is assumed for inaccuracies. The information contained in this documentation is subject to change without notice. In no event will LEBA Innovation or Partners be liable for direct, indirect, special, incidental, or consequential damages arising out of the use or inability to use this product or documentation, even if advised of the possibility of such damages.

The mark of Crossed-out wheeled bin indicates that this product must not be disposed of with your other household waste. Instead, you need to dispose of the waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. For more information about where to drop off your waste equipment for recycling, please contact your waste disposal service or the shop you purchased the product from. Discard all carton packaging after local standards for Honeycomb packaging and additional plastics.

Certificates and Important Information

European Community Compliance Statement (Class A)

This product is herewith confirmed to comply with the requirements set out in the Council Directives on the Approximation of the laws of the Member States relating to Electromagnetic Compatibility Directive 2014/30/EU.

A Class product

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

Country of origin: China

This User Guide pertains to the following part numbers:

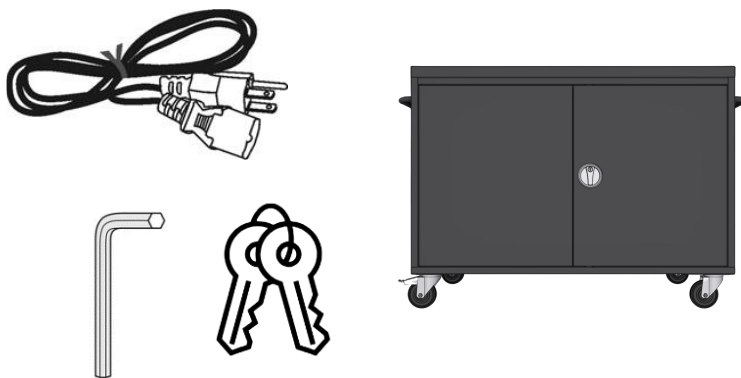

- NCU-14-TUN-SC

Furthermore: for NoteCart Tunis solutions with accessories and/or bundles.

Content

The package contains the following items:

Kindly control if any items are missing before using the NoteCart.

- ✓ NoteCart Tunis
- ✓ Power cable
- ✓ Device compartment Key
- ✓ Electronics compartment Key
- ✓ Handles

Maintenance, General Usage and Safety

Cleaning: To keep the NoteCart in good condition, clean with a damp cloth only. Do not use excessive water or other detergents to clean the product.

Usage and preparation: Before accessing the electronics compartment, kindly disconnect any power supply.

Maintenance: It is recommended to check the connecting cables regularly to ensure charging capabilities.

Transportation: Make sure to unplug the power cable from the power source before transportation. Use the cable holder to prevent any damage.

Troubleshooting

Before contacting your local reseller or LEBA Innovation for issues regarding your product, kindly check the box below for a quick guide on solutions.

Power Supply issues:

To examine any problems related to power supply, please open the NoteCarts electronics compartment using the key, and remove all devices.

Disassemble the screws on the metal side plates (for reference see the "Preparation: Cable Holder and Cable Installation Guide, Section 1").

Issue	Solution
1a. A cable has been disconnected from the charger.	Kindly plug back in the cable.
1b. A charger has been disconnected from the main power panel and the chargers LEDs are no longer lighting up.	Kindly control that all connecting cables are fastened and securely attached. If/when the LEDs turn back on, check if the device is charging.
1c. The Short circuit surge protection is blinking Red, and no power is active in the cart.	Locate the Main power panel inside the electronics compartment. The Surge protection is the rectangular box with an LED light. If the light is off, contact your local reseller for a new surge protection unit replacement.
1d. The devices are not fully charged/charging at full capacity.	Have a qualified electrician verify the current consumption of your devices. Perform the test with devices fully charged. Ensure the devices are not exceeding the allotted power output of the chosen charger solution.
1e. Circuit over load	You may have too many appliances sharing the same circuit. Please have a qualified electrician to measure the power adequacy available in the circuit.
1f. 1 device/port in the charger is not charging.	To evaluate if the charger (e.g. a specific port), the cable or the device that has issues, please try to change the cable to a different one to see if charging issues persist. If issues continue, contact your local reseller or LEBA Innovation
1g. The product is damaged upon arrival	Kindly see warranty and service. Prepare photo of the damaged parts and contact rma@leba-innovation.com or your local reseller.

For any remaining questions regarding the product, please do not hesitate to contact your local reseller or LEBA Innovation.
